MD. RASHEDUL ISLAM

FULL-STACK WEB DEVELOPER

📍 Dhaka, Bangladesh 📞 +880 1637-022108 ✉️ rashedulislamrynee@gmail.com 🔗 LinkedIn 💻 GitHub

PROFESSIONAL SUMMARY

Analytical and results-driven Full-Stack Web Developer with a background in Electrical & Electronic Engineering. Specializing in the React/Next.js ecosystem and Node.js backend architecture. Proven ability to independently architect, build, and deploy full-stack web applications, translating complex problems into scalable, user-centric solutions. Seeking to leverage strong problem-solving skills and a passion for clean code in a dynamic software engineering team.

TECHNICAL SKILLS

Frontend:	Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
Backend & Database:	Node.js, Express.js, MongoDB, Mongoose, REST API Development
Tools & Libraries:	Git, GitHub, Better Auth, ShadCN, Hero UI, Responsive Design
Exposure / Learning:	Stripe, SSLCommerz, AI Integrations, Role-Based Access Control (RBAC)

TECHNICAL PROJECTS

FitLog — Full-Stack Fitness Tracking Platform

Next.js, TypeScript, MongoDB, Better Auth, Hero UI

🔗 **Live Project** 💻 **GitHub Repository**

- Architected and deployed a responsive web application that enables users to organize fitness plans and manage saved workout activities.
- Engineered a secure backend database using MongoDB and implemented robust user authentication flows via Better Auth to protect personal data.
- Developed reusable, mobile-first UI components using Hero UI and Tailwind CSS, ensuring a seamless experience across desktop and tablet devices.
- Managed client-side state for workout plans and integrated custom REST APIs for dynamic, real-time data retrieval.
- Led the end-to-end development lifecycle independently, from UI/UX design to backend integration and final deployment.

BazarDor — Daily Market Price Tracker

Next.js, TypeScript, MongoDB, Better Auth, Hero UI

🔗 **Live Project** 💻 **GitHub Repository**

- Built a modern consumer application designed to help users quickly view, filter, and compare the prices of everyday grocery and market products.
- Designed scalable MongoDB schemas to handle dynamic product categories and fluctuating market price information.
- Implemented secure email/password and social login functionality, securing product-detail and user-specific routes.
- Optimized the user experience by engineering advanced category filtering, dynamic sorting mechanisms, loading states, and custom toast notifications.
- Delivered a highly performant application by utilizing Next.js server-side rendering and optimizing API response times.
